GOVERNMENT OF KARNATAKA

ONLINE TALK

AN HOUR WITH

ENRIQUE ZUAZUA

Alexander von Humboldt Professorship,
Friedrich-Alexander-Universität, Germany

DATE
Aug 6, 2026

TIME
12:00 PM (IST)

MODE
Online (Live)
Q&A included

AN IQAC INITIATIVE

ORGANIZED BY

Department of Sciences

Smt. Indira Gandhi Government First Grade Women's College, Sagara
Karnataka, India

TITLE

Control and Machine Learning: A Mathematical Journey

Control theory, also known as cybernetics, a term first introduced by Ampère and later popularized by Norbert Wiener, studies regulation and communication in animals and machines. Its roots can be traced back to antiquity and to the enduring human ambition to design mechanisms capable of acting autonomously, thereby extending both freedom and efficiency. The goals of control systems resonate strongly with those of modern Artificial Intelligence (AI). This connection highlights not only the deep unity of mathematics but also its remarkable power to model natural phenomena and shape technological innovation.

In this lecture, we will trace the historical development of control theory, highlight some of its fundamental mathematical principles, and reveal key links to contemporary machine learning paradigms. We will also present representative applications and success stories that illustrate the transformative impact of the interplay between control and learning.

CHAIRED BY
Prof. Chandrashekara T.
Principal

TECHNICAL EXPERTS
Mr. Umesh D.
Dr. Shivakumara B. C.

MODERATORS

Prof. Shivanand S. Bhat | Dr. Vijayakumar | Ms. Navya G.

CERTIFICATE OF APPRECIATION

THIS CERTIFIES THAT

DR. VIJAYAKUMAR

of

Smt. Indira Gandhi Govt. First Grade Women's College, Sagara

Worked as a Convener for an Online Talk on

"Control and Machine Learning: A Mathematical Journey"

delivered by

PROF. ENRIQUE ZUAZUA

Friedrich–Aleander–Universität, Germany

Organized by

Departments of Sciences

Smt. Indira Gandhi Govt. First Grade Women's College, Sagara

On August 6, 2026

Convener | IQAC Coordinator | Principal
